The CO<sub>2</sub> emission and fuel consumption values are defined based on official tests, in conformity with the provisions of the EU Regulations in force at the time of homologation. In particular, the indicated values are calculated based on the WLTP test procedure.

The CO<sub>2</sub> and consumption values are only indicated for the purpose of comparing the vehicle data. The CO<sub>2</sub> and consumption homologation values may not be representative of the effective CO<sub>2</sub> and consumption values, which depend on many factors related, for example, to weather and road conditions and to vehicle condition, use and equipment. The CO<sub>2</sub> and consumption values specified in this document refer to the versions of the vehicle with the highest and lowest values.

These values may change depending on the selected equipment and/or tyre dimensions. The indicated CO<sub>2</sub> and consumption values are not definitive and may evolve if the production cycle is modified. In any case, the official CO<sub>2</sub> and consumption values of the purchased vehicle will be provided with its accompanying documents.

If the CO, and consumption values affect the calculation of the vehicle duties and taxes, refer to the applicable standards in force.
