DUCATO

GOODS TRANSPORT

MORE THAN WORK

Change your outlook on work.

Forget about the traffic, the stressful journeys and the long days. Fiat Professional offers a new perspective for a more enjoyable working day, with new Ducato as your ideal work mate.

EXPLORE THE RANGE

New Ducato strives to make your day easier with the many versions available to choose from. This versatile, practical work partner can be configured to suit your business requirements which means that whatever the job, there is a Ducato for you.

Ready to go.

Don't settle for a good day,
when you can have a great one!

A successful day requires the right tools to get the job done, and Ducato is the ideal partner to support your business. It provides you with all the equipment you need plus a fresh and innovative new style for an enjoyable working day. A new look on the road is provided by the new front grille and by the full LED headlamps.

Comprising of 3 characteristic elements, a new DRL LED "ray of light" that evolves the classic Ducato's shape, a high and low LED beam and a swiping LED turn indicator that will make you stand out on the road. Its sharper style and its cold white light make the vehicle distinctive when both off or on.

New front grille is available in two finishes and comes in a modern style, highlighting the new FIAT logo.

Stylish new LED headlamps.

Your easy working environment.

Comfort, technology and driving pleasure as standard.

Nowadays the tools you need for your job aren't only the ones you find in your tool-kit. Ducato offers you much more to make all your everyday tasks easier and more efficient. The high-tech and modern style from the latest passenger vehicles' interior trends are now featured in the new Ducato range without changing its functionality oriented design. From maps to driving assistance or work data and even music, all the information you need is now available on the new Full Digital Cockpit.

An interior refresh has been applied to the main Ducato interior features: the new range of seats provide greater comfort, door panels offer new robustness and more essential storage space, the three spoke steering wheel, available in leather, provides better grip.

Enjoy the new cabin interior with its innovative design, where everything is practically located in an up-to-date dashboard and at your fingertips.

The new Eat and Work seat bench turns out to be the perfect assistant in working and break moments: equipped with a front table that can accommodate notebooks, laptops and lunch trays, it can rotate towards occupants for maximum comfort. The latest design and high tech dashboard features have been applied to the interior cockpit. The new, full digital cockpit shows a central 7" display. It provides vehicle data tailored to the driver's needs, 3D maps and route information with 10" radio and driving assistance (when coupled with ADAS features). A new and modern design for the 3.5" TFT cockpit completes the offer.

Comfort & driving pleasure.

A key feature in the Ducato that will enhance your time spent driving is the new electric power steering wheel. The new power supply technology creates the perfect optimisation between steering effort and speed, allowing better steering precision, driving pleasure and lower effort during parking manoeuvres. From the comfort of their seat, the driver can also simply press a button on the dashboard to activate the electric parking brake. An efficient, easy drive is a real gift for a busy worker so what better way to start your day than with a simple click? Forget searching for your key fob, leave it in your pocket and simply press the button on the exterior handle, unlock the doors, make yourself comfortable in the driving seat and press the switch on the steering column to turn the engine on.

With the optional wireless phone charger located in a safe place on your dashboard your mobile will always have a full battery.

The new electric park brake option helps to offer a clearer interior layout.

Finish your working day in the same easy way. All in a switch. And there's no need for phone wires in your cabin. Your phone can always be fully charged as Ducato offers you a safe and firm place on the dashboard with the optional wireless charger, through which your mobile can charge and, combined with the new Uconnect™ radio, work in sync to keep you updated and entertained.

Keyless Entry and Go system allows you to lock and unlock the cargo and cabin doors and turn the engine on and off, simply by having your Ducato key fob near to you.

The tools you need.

Improve your day with a comprehensive network of infotainment services.

The new infotainment system takes in-vehicle information, comfort and entertainment to the next level. With 3 new radios available, Uconnect™ Technology offers you all the tools and services to help your working day run smoother and smarter.

The new Uconnect™ 10" radio (optional), at the top of the range, will offer you a complete radio navigation system integrating 3D TomTom maps and Apple CarPlay / Android Auto™ with a practical wireless mirroring system through which, with a simple touch, you can manage the most important controls of the vehicle. A very useful voice command "HEY FIAT" and steering wheel commands will improve the interaction between you and your new Ducato. The Uconnect™ 7" radio with wireless integration with Apple CarPlay and Android Auto™ and Uconnect™ 5" colour display radio complete the new Ducato's connected infotainment offer. Just simply choose the one that fits better to your needs, turn on the radio and enjoy your day.

Apple CarPlay is a safer, smarter way to use your iPhone in your car. It lets you get directions, make calls, send and receive messages, and listen to music, all in a way that lets you stay focused on the road.

Designed a safer driving experience whilst staying connected, Android Auto™ delivers integrated steering wheel and voice commands.

Uconnect™ 7" radio with 7" touchscreen colour display, Android Operating System technology and steering wheel controls.

Connect your world.

With a signal, a full range of services is available to you.

For a seamless connectivity journey between your mobile, network devices and your Ducato, a full range of Uconnect™ Services is available with the new Uconnect™ 7" and 10" radio. Explore all the advantages included with the connectivity pack and others available to add.

MY ASSISTANT

Designed to offer your 24/7 assistance with features such as SOS Call, Roadside Assistance and Customer Care.

MY REMOTE

Designed for remote management, allows the control of features such as Remote Operations, Drive Alerts, and Vehicle Finder.

MY CAR

Designed to monitor and take care of new Ducato's health, thanks to Vehicle Info and Vehicle Health Report.

MY NAVIGATION

Designed to help to find your way in the smartest way possible, thanks to live navigation services like Send&Go, POI Search and Last Mile Navigation, Map Update over the air and much more.

MY ALERT

Designed to protect Ducato, with Theft Alarm Notification and the Stolen Vehicle Assistance Services.

MY WIFI

Surf the Internet and connect multiple devices to the New Ducato at the same time and use Amazon Alexa Voice Services.

MY FLEET MANAGER

Manage your Ducato fleet with maximum efficiency and safety: maintenance, mission, routes, reporting and real time dashboard to monitor your fleet with the possibility to integrate it with your already existing fleet telematic solutions.

Download the FIAT mobile app or go to the official Fiat Professional website to take advantage of all the services.

Raw Data Integration

New Ducato Connectivity is open and interoperable with 3rd party solutions thanks to raw data integration. It can provide key fleet vehicle information (vehicle usage, deep diagnostic info, critical event alerts, remote services), to the enterprise customer and their existing fleet telematics service provider.

Looking after you for the future.

Ducato shows all its progressive attitude.

Over the last 40 years, Ducato has continued to evolve: it now offers Autonomous Driving Level 2; providing advanced protection for your daily journeys making your job safer and your travels stress-free. Ducato provides driver assistance in steering, acceleration, and braking events, in different scenarios. Are you ready to make a step into the future?

Thanks to its electrical architecture, innovation in security features are the new Ducato standard, offering safety in your workplace and a stress-free driving experience with the Co-Driver assistance. An option for Automatic versions, Level 2 autonomy elevates Ducato from a single driver system to multiple ADAS that can provide driver assistance in steering, acceleration, and braking events in different scenarios.

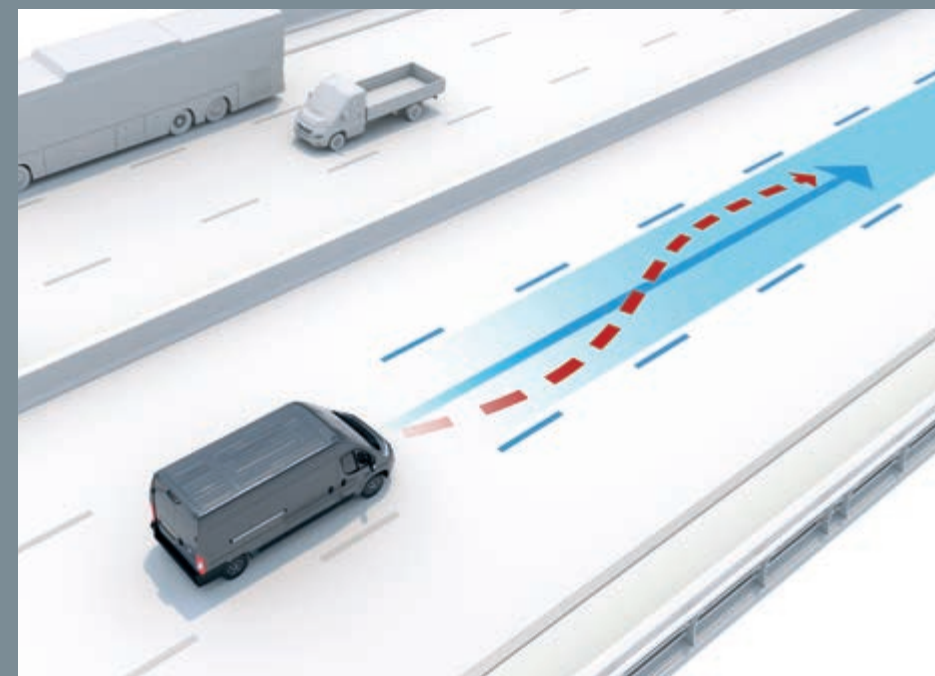

ADAPTIVE CRUISE CONTROL (WITH STOP AND GO FUNCTION)

When included in the pack Co-Driver, the Adaptive Cruise Control is enhanced with Stop and Go functionality, leading the vehicle to a complete stop when the vehicle in front stops and to re-starts when traffic gets moving again.
Available only with the CO-DRIVER pack. (Automatic Transmission only)

TRAFFIC JAM ASSIST

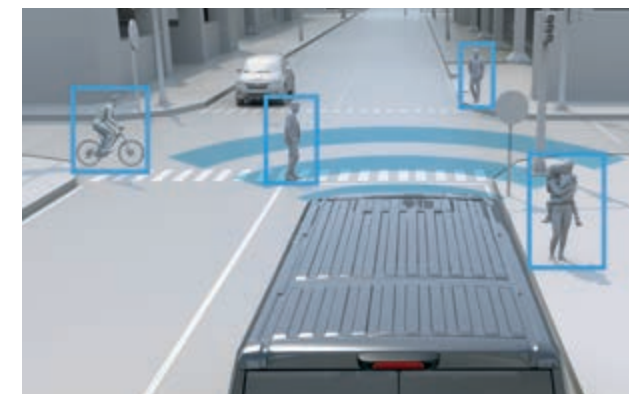

The new Ducato can autonomously spot the vehicle ahead to manage lane centering in heavy traffic on all roads and monitor vehicles driving in parallel, adapting its lateral trajectory and avoiding potential impacts. If the Traffic Jam automatically brings the Ducato to a complete stop, it automatically returns to the set speed as soon as the traffic gets moving again.
Available only with CO-DRIVER pack. (Automatic Transmission only)

LANE CONTROL

When included in the pack Co-Driver the lane control system becomes lane centering. The New Ducato detects lane markers and road edges and, if needed, autonomously steers to keep itself in the centre of the lane.
Available only with the CO-DRIVER pack. (Automatic Transmission only)

A range of brand new ADAS will be available in your new Ducato giving you the best in term of safety and support both when driving and parking. All new and existing ADAS on Ducato work in synergy, they work wherever your job will take you, whenever you want.

AUTONOMOUS EMERGENCY BRAKE CONTROL (+ PEDESTRIAN AND CYCLIST DETECTION)

AEB Control functions by using a radar and a camera which can track the movements of both pedestrians and cyclists using their predicted travel paths, and if a collision risk is imminent the system can sound an audible alarm and then automatically apply the brakes.

LANE CONTROL

Lane Control system prevents unintentional departure from the lane, with the help of a forward-facing camera on the windscreen performing corrective steering interventions to prevent the vehicle from crossing painted boundary lines or even roadside edges. A tactile warning in the form of torque applied to the steering wheel, together with visual and audible warnings on the instrument panel display, to alert the driver they must stay within the lane limits.

ADAPTIVE CRUISE CONTROL

"Sets and automatically adjusts the speed to maintain a safe distance from vehicles ahead, providing functionality from 19 mph.

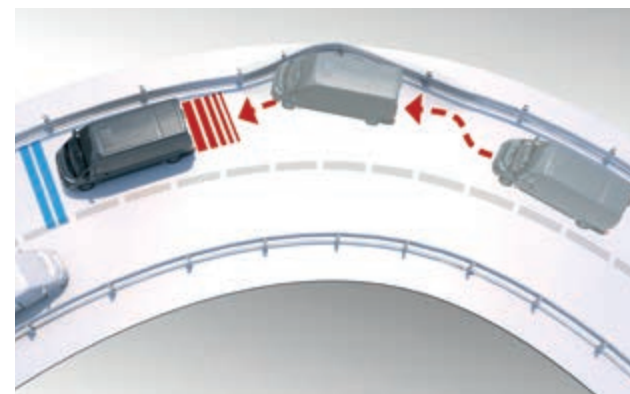

INTELLIGENT SPEED ASSIST

Intelligent speed assist helps detect speed warning signs on the road and sets the vehicle speed limiter accordingly.

TRAFFIC SIGN RECOGNITION + HIGH BEAM RECOGNITION

Traffic Sign Recognition helps to avoid speed violations at any time, detecting speed warning signs on the road, while the High Beam Recognition automatically regulates beams based on the distance of vehicles coming on the opposite way.

AUTONOMOUS POST COLLISION BRAKING

In case of an accident event, automatically apply brakes to prevent secondary potential collisions. Standard on whole range.

360° PARKING SENSORS

Sensors, surrounding the new Ducato at 360° – located on front, rear bumpers and side moldings – alert driver by acoustic and visual warning when approaching obstacles or going through tight spaces. Acoustic warning increases in beep frequency as the obstacle comes nearer, until it becomes continuous. Visual warning showing the distance from obstacle are displayed on cluster screen.

ATTENTION ASSIST

The system monitors driving patterns and detects fatigued driving. If the system detects inattentive driving patterns, an audible sound and message on the display panel will request the driver's attention.

CROSS WIND ASSIST

Cross Wind Assist works at speeds over 40 mph and intervenes on braking to help stabilise the vehicle through strong crosswinds, helping the vehicle to avoid drifting out of its lane. Standard on whole range.

DIGITAL CENTRAL MIRROR

Central Rear view Mirror becomes a digital 9" LCD high resolution display. When driving it provides an unobstructed and clear view of the road behind at medium and long distances, thanks to a wide-angle, high-definition camera located inside the rear third stop lamp bracket.

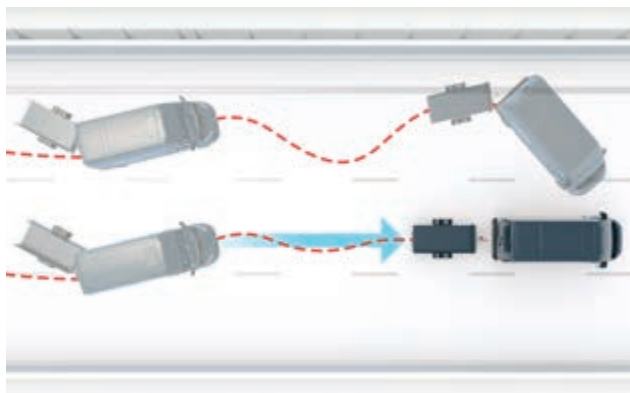

ACTIVE PARK ASSIST

When looking for an available parking space, the new Ducato will start scanning for a parking slot. When found it will start a parking manoeuvre, and the driver needs only to accelerate and brake by the pedals, while vehicle autonomously performs steering manoeuvres, and indicates when to move forward or backward.

RAIN AND DUSK SENSOR

The sensors are activated by water and low-light, controlling the windscreen wipers automatically or switching on the main-beam headlights when the lights go down.

TRAILER STABILITY CONTROL

The system is able to detect when the trailer is starting to oscillate and corrects any dangerous trailer swing, through a combination of torque reduction and wheels braking, to bring the trailer and the vehicle under control. Standard on whole range.

REAR CAMERA (WITH DYNAMIC GRIDLINES)

Updated rear parking camera offers improved resolution on radio screen, thanks to digital signal, displays dynamic grid lines that move according to steering wheel turns helping driver to easily complete parking manoeuvres by showing vehicle path. Compatible with the whole new Uconnect™ 5", 7" and 10" radio offer.

FOG LAMPS (WITH CORNERING FUNCTION)

Fog lamps option now includes cornering function to provide greater side visibility in the dark, fog lamps switch on automatically when vehicle turns at low speed.

A new efficiency.

A legacy that came from over 40 years of tradition.

The new generation of MultiJet₃ powertrains are developed to provide: Top **Efficiency** levels with reduced fuel consumptions, emissions and weight; **Durability** up to 186,000 miles thanks to industrial style design; peerless **Comfort** made possible by higher torque elasticity and reduced noise. Ducato evolves again, with no compromises on power or performances. You and your work will always be a step ahead.

"One mission, one engine".

Ducato presents new diesel engine technology with the third generation MultiJet₃.

The complete line up of Euro 6D-Final (Light Duty Homologation) and Euro VI Step E (Heavy Duty Homologation) 2.2 MultiJet₃ engines will represent adapted solutions to different business needs, for a range of roads and driving conditions that you may experience in your working day.

The MultiJet₃ 120 hp is the perfect fuel-efficient solution ideal for an urban environment. The MultiJet₃ 140 hp is the "core" power unit, progressive in all conditions with high torque availability; the right compromise between power and consumption. The MultiJet₃ 160 hp "Power" is the best choice for those wanting something more when on longer, more intensive journeys. The MultiJet₃ 180 hp "Power" is the ideal choice for the longest jobs and toughest terrains, heavy conversions and those wanting top level performance and comfort.

120 HP

Displacement (cm³): 2.184

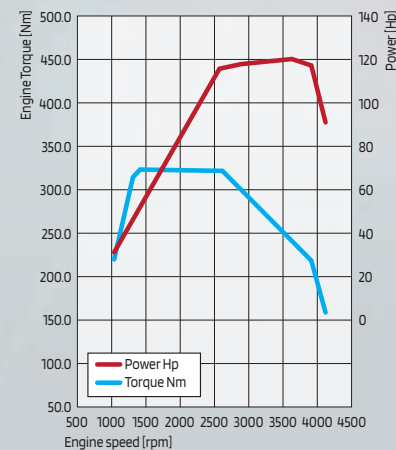

N° of cylinders, layout: 4, in line
-industrial type design

Fuel system: electronically controlled Common Rail MultiJet₃ direct injection with variable geometry turbocharger and intercooler

180 HP

Displacement (cm³): 2.184

N° of cylinders, layout: 4, in line
-industrial type design

Fuel system: electronically controlled Common Rail MultiJet₃ direct injection with variable geometry turbocharger and intercooler

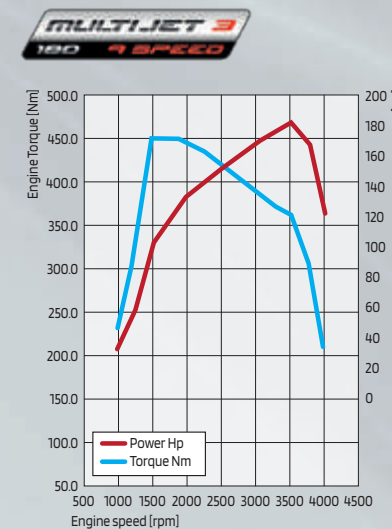

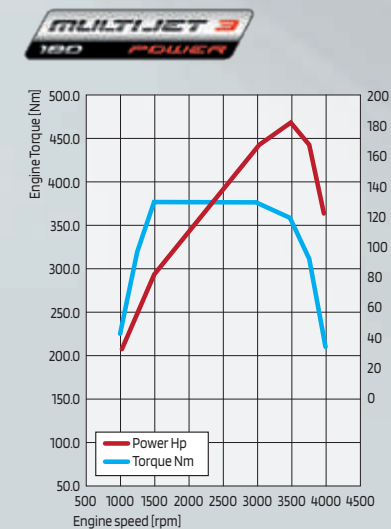

Power: 180 hp (130kW) at 3500 rpm

Torque - coupled with manual transmission: 380 nm at 1400 rpm

Torque - coupled with automatic transmission: 450 nm at 1400 rpm

Light duty homologation, emission level:
Euro 6D-Final

Heavy duty homologation, emission level:
Euro VI step E

HEAVY DUTY HOMOLOGATION

Designed specifically for converter applications, heavy duty homologation is possible with a kerb weight starting from 2,280 kg and is mandatory when it exceeds 2,740 kg.

New Ducato comes with a range of Euro VI step E powertrains in heavy duty homologation: 140 hp, 160 hp "Power" and 180 hp "Power" both with Manual and Automatic transmission, keeping the same torque and power curves of corresponding light duty applications.

MANUAL TRANSMISSION. Engine coupling: Dry single plate clutch with hydraulic release device. N° of gears: 6+R -
AUTOMATIC TRANSMISSION. Engine coupling: Torque converter, with electronic electro-hydraulic control system. N° of gears: 9+R

Reach your target destination.

Get the best from your working day with the new 9 speed automatic transmission.

Your work may lead you to different roads and driving conditions, but thanks to the all-new 9-speed automatic transmission you can forget about constantly shifting gears. The new 9-speed automatic transmission is designed for optimal driving enjoyment. A modern torque converter has taken over the conventional clutch, allowing you to shift comfortably and efficiently. This assures the perfect gear is always engaged without effort and above all with the best fuel consumption optimisation.

Moreover the new 9-speed automatic transmission allows the driver to select the best driving mode according to his mission: starting from Normal for the perfect balance between performance and economy, ECO for a fuel economy goal, and Power for more intensive missions with hills or full loads.

The right dimensions.

Roomy and flexible, new Ducato offers you all the space you need.

Whatever your job is, with its great versatility and cargo area volume up to 17 m³, Ducato will prove itself as a trusted partner, offering you all the room your job needs.

Keeping professionals on the move.

Whatever your job is, Ducato offers great range versatility, allowing you to arrange and store goods safely. It's your ideal work-mate. With a loading volume from 8 to 17 cbm, a payload capacity up to 2200 Kg and 270° angle available for rear door opening, you can transport all goods and tools needed for your day at work. And the low loading threshold simplifies carrying, preventing scuffs and scrapes from lifting items and makes everyday loading/unloading easier.

A genuine team leader!

Ducato knows that you need a good team to to succeed. In the crew van version, it offers the perfect combination of storage space, with additional seating for your team. Comfortable seating, easy to open sliding doors and storage compartments create a professional, functional and enjoyable interior.

Ducato also offers the flexibility and option to remove your seats, in order to obtain more load capacity. Fiat Professional demonstrates its exceptional versatility and ability to respond to your needs.

Smooth truckloads.

A versatile work-mate.

With Ducato, more room means more capability. The Ducato Truck range features a choice of single cab and double cab versions to fit your team requirements plus a range of wheelbase lengths and payload capabilities.

Heavy loads, light work.

A full range of single and double cab versions, a wheelbase range from 3450 mm to 4035 mm, lengths from 5.7 m to 6.7 m and a payload capacity up to 2.1t. These are figures which underscore the versatility that the Ducato Truck can offer.

Ducato extends your choice with its truck version, which is the ready-to-load vehicle for any activity thanks to its modular structure.

An easy to carry load.

Handling a heavy load has never been so easy with Ducato Truck. Your perfect assistant.

Ducato truck is wholly conceived in house by Fiat. Enjoy its wide loading surface, from 4.9 to 8.5 mq, its practical side-boards, rear boarding folding step and its very convenient non slip surface: every detail is designed to make your work more and more efficient and lighter for you.

Backway
tipper
version.

Make it yours.

Ducato and Fiat Professional have created a well-rounded and stylish work vehicle.

Now it's your turn to leave your mark and personalise your van to meet your particular needs. Add features such as the Eat and Work Seat bench or the Wireless Phone Charger for instance, and turn your cab into your office.

KEYLESS ENTRY AND GO
With Keyless Entry you can easily unlock/lock all the cabin and cargo doors of the new Ducato, without actually using your keys. With Keyless Go you can start and turn off the vehicle without using the keys. As a support to specific missions, doors can be locked and unlocked by keeping engine on.

ELECTRIC PARKING BRAKE
The new electric park brake provides greater comfort for everyday use. The driver can activate holding mechanism by a dedicated switch located on dashboard; functionality can even be automatically enabled through a specific instrument cluster setting.

WIRELESS PHONE CHARGER
Improved connectivity and convenience onboard, allowing users to easily place and charge a smartphone in a safe and firm place on the dashboard.

EAT AND WORK SEAT BENCH
Conceived to be the perfect assistant for driver and passenger during work times and breaks. Ducato is equipped with a front table that can accommodate notebooks, tablets, lunch trays that can rotate towards occupants for maximum comfort and a rear zone organised with cupholders and storage spaces.

FULL-LED HEADLAMPS
The new high performance full LED headlamps offer top-level exterior lighting. Composed of a new DRL LED "ray of light" with evolutionary family feeling and sharper style, LED high beam and low beam and a LED turn indicator with swiping effect.

FULL DIGITAL COCKPIT
A 7" digital TFT colour display and two side digital gauges for RPM and fuel level. The central display provides a complete set of vehicle setups and info, offering great reconfigurability to any driver's needs.

DOUBLE USB CHARGING PORT
USB charging port on dashboard gets an updated design becoming double USB A + C standards.

FOG LAMPS
Fog lamps option now includes cornering function to provide greater side visibility in the dark, fog lamps switch on automatically when vehicle turns at low speed.

DRL LED ON HEADLAMPS
You can spot a Ducato at once from its LED daytime running lights. LEDs last longer than normal bulbs and reduce fuel consumption because they use less electricity.

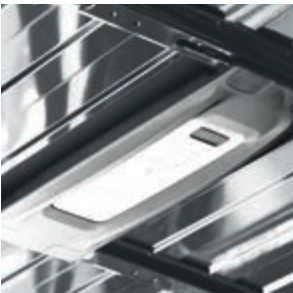

AUTOMATIC CLIMATE CONTROL
New design of climate control with a wide central display, showing setup of air temperature, air distribution and ventilation speed. System offers 7-way distribution and a new "Max A/C" function to boost cooling performance.

HEATED WINDSCREEN
Quicker windscreen defrost and defog even in extreme cold climate conditions.

TECHNO DASHBOARD TRIM
Handy air flow adjustment, available in satin chrome finish with the techno dashboard option.

CARGO LED DOME LAMP
The load compartment can be illuminated by a powerful LED with a neutral white colour and infrared sensors; three dimensions based on vehicle wheelbase.

LEATHER STEERING WHEEL AND GEARBOX LEVER
A more comfortable and engaging rim design and new commands located on and behind lateral spokes wrapped with leather, satin chrome decorative bezels and glossy black commands. Redesigned gearbox command on both manual and automatic versions, available also with lower body in leather.

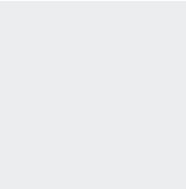

ADJUSTABLE PNEUMATIC SUSPENSIONS
Offers self-levelling function and possibility to decrease load threshold when vehicle is parked, activating specific switches on dashboard. Vehicle is always balanced independently from load distribution.

Work smart.

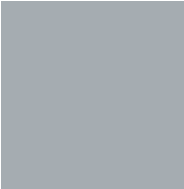

Ducato presents itself as the perfect balance between efficiency and style, tailor made for your business needs.
